ABOUT ME

Motivated Computer Engineering student with a strong foundation in Machine Learning and Web Development. Skilled in Python, Django, and Scikit-learn, with hands-on experience in developing data-driven applications. Built an Integrated Academic and Placement Prediction System to analyze student performance and predict placement outcomes. Eager to apply technical knowledge to real-world problems and continuously enhance skills in software development.

EDUCATION

Sal Engineering & Technical Institute | 2023-2026

Bachelor of Computer Engineering | CGPA : 7.07

Currently pursuing a Bachelor's degree in Computer Engineering with a focus on machine learning and data-driven applications, gaining foundational knowledge in algorithms, databases, and software development.

L.J. Polytechnic | 2020-2023

Diploma of Computer Engineering | CGPA : 7.55

Completed a diploma in Computer Engineering, building a strong foundation in core computing concepts including programming, networking, and hardware systems.

WORK EXPERIENCE

Sparks to Ideas | Jan 2026 - April 2026

AI/ML Intern

Worked on developing an end-to-end machine learning web application, gaining practical experience in data preprocessing, model training, and deployment using Python, Scikit-learn, and Django.

SKILLS

- Python
- Django
- Model Evaluation
- Communication
- Scikit-learn
- SQLite
- VS Code, Git, Jupyter Notebook
- Problem Solving
